

Protective Caps

The Safest Protection for your
Hirschmann Automotive Connector

HIRSCHMANN
AUTOMOTIVE

DRIVEN BY QUALITY AND INNOVATION

External influences as dust, dirt or water can harm connectors. Hence, we developed caps which protect and stabilize them. The protective caps are designed ergonomically and they close completely. This saves valuable installation space. The simple and secure catch with film hinges ensures a robust and torque-proof position at the housing.

Our protective caps are available for different pole numbers and cable outlets. They can be used for our connectors SealStar 1.2 and 2.8 as well as SealStar HMK 1.2.

Characteristics:

- ergonomically designed dress covers for the optimum power transmission during insertion
- same protective cap is compatible with multiple connectors
- simple processing technology
- intuitive assembling
- tests according to GS95006-7-1 (LV 214) / MBN 10384 (LV 214) / VW 75174 (LV 214) as well as higher requirements in terms of robustness (assembly/disassembly and rotation prevention)
- monobloc protective cap with film hinge
- locating surface for mounting aid
- inspection opening to control the closed locking position
- suitable for high-pressure and steam cleaning according to IPX9K

THIS PRODUCT IS AN ACCESSORY OF THE PRODUCT FAMILY 1.2 AND 2.8 SEALSTAR AND 1.2 SEALSTAR HMK.

TECHNICAL PRODUCT INFORMATION

CABLE OUTLET

180°, straight exit
designed for nominal width (NW) 4.5

90°, left or right exit
designed for nominal width (NW) 4.5/7.5

mounting on both sides

COLOR

black

MATERIAL

PA6

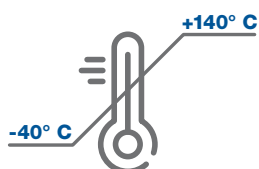

PITCH

6.0 mm

RESISTANCE

according to GS 95024-3-1 (LV 124), MBN 10306 (LV 124), VW 8000 (LV 124)

TEMPERATURE RANGE

ERGONOMIC GRIP AREA FOR OPTIMAL POWER TRANSMISSION
