DRIVEN BY QUALITY AND INNOVATION

Lightweight designs and efficiency are calling for even smaller components.

The SealStar housings are a robust and top-performing generation of connectors with minimum space requirements. Renowned OEMs and their system manufacturers were involved in the development process.

The innovative design of the housings makes them compatible for the use with a range of different contacts.

Characteristics:

The variable housings withstand high thermal and dynamic loads. Furthermore, they have a variety of other positive features:

- compliant with test specification LV214 & USCAR2
- watertight according to IPx8/IPx9K
- single-wire sealing and robust radial sealing
- CPA (Connector Positioning Assurance)
- convenient and secure connection with audible feedback of detent function
- completely pre-assembled product
- locking element either right or left of the protective shroud possible
- designed in accordance with VDA guidelines
- primary and secondary locking
- different female versions available (flipped key coding/protective shroud: flashed over cavities)
